TRIDIUM

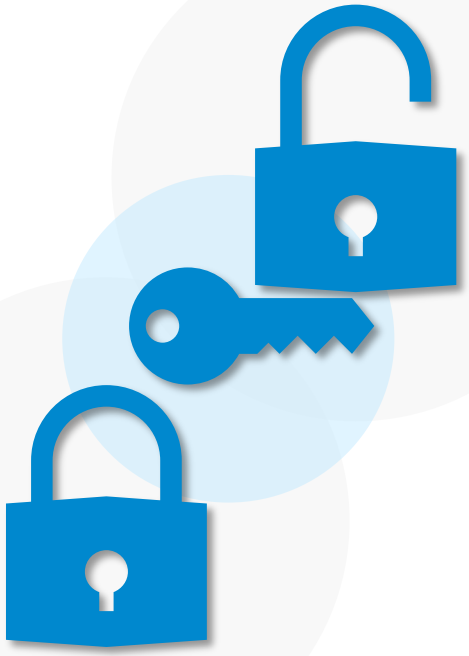
Why Use Single Sign On??

TRIDIUM

Save Valuable Time and Resources Across Your Organization



- Improves the security posture of your stations by centralizing user credentials and management

- Reduce reliance on IT support infrastructure when accessing Niagara Stations via a browser

- Instead of manually configuring and managing an external IdP, users can utilize Niagara as an IdP

Improve User Navigation and Experience Across Niagara Infrastructure

- Seamlessly access multiple stations without have to reenter a password

- Mitigates risks for access to third party systems

- Eliminates password fatigue and reduce the time spent re-entering passwords for the same identity

How Do I Use Single Sign On??

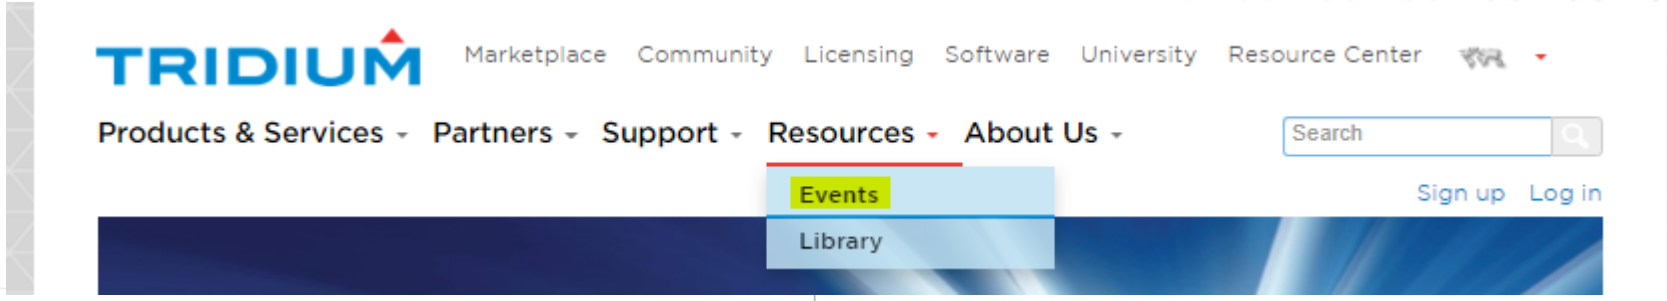
Where Can I Find More TridiumTalk?



Leveraging provisioning in an enterprise Niagara system

James Johnson walks through how to perform tasks such as disaster recovery backups, managing station and platform users, managing TLS certificates, updating security settings, configuring NTP, deploying templates and more.

Q & A Document

Download Niagara 4.8 Example Bog File (password: tridium) Copy the partial bog file into your own station to view the Provisioning Jobs in the same way that was shown in the webinar.

Enhanced Graphics with Tag Based Visualization

Product Manager Stephen Holicky and Advanced Software Engineer Eric Anderson will provide an overview on how to create new, and edit existing, Niagara graphics to incorporate tag based PX bindings. While reviewing several examples, the team will discuss how to automatically convert existing Niagara graphics to utilize tags, the required syntax when manually creating tag-based graphics and other time-saving recommendations that will quickly help you get the job done right.
