Tridium appoints John Petze President and CEO; Jerry Frank CTO

Richmond, VA, (September, 2002) - Tridium, Inc.[™], a leading provider of Internet-enabled, energy and automation software infrastructure and applications, announced the appointment of John Petze as President and Chief Executive Officer effective immediately. Jerry Frank, current President, CEO and company Founder will continue on Tridium's Board of Directors and serve as Chief Technical Officer.

In his new role as CTO, Jerry will transition day-to-day operations over to John and focus his complete attention towards driving Tridium's next generation technology vision and roadmap for the company. He will be working in close consultation with customers and key partners to better define Tridium's future products and expand the company's position as an industry leader and innovator. Jerry will also chair Tridium's newly formed Technical Advisory Board.

John Petze, newly appointed President and CEO, commented, "These management changes are a natural evolution within Tridium. Jerry has done an outstanding job leading Tridium from a great idea to a successful business. As a result of his vision and drive, we have great technology, great products, and a strong worldwide organization. The appointment of Jerry to the Chief Technology Officer position fills an important and strategic leadership role in the company. Technology is our lifeblood and the CTO role in Tridium requires a senior executive with strong leadership skills, a diverse technical background and experience, and a passion for delivering value to our customers."

John Petze joined Tridium in June, 2000 as Vice President of Operations and Business Development where he has been instrumental in accelerating the growth of Tridium from start-up phase to one of the industry's leading suppliers of networking infrastructure. John's combination of technical expertise and management skills have helped grow the company while instilling the necessary processes and discipline required for rapid, customer-focused growth. John also directed the company's most recent strategic initiative focused on creating tools to help energy service providers and end users of energy products manage their valuable resources, costs, and risk. This effort has positioned Tridium as a leading supplier within these industries.

"This management transition has been in the works for quite some time. John has demonstrated an exceptional ability to master the ins and outs of a complex software business. I am very confident that John's proven abilities, skills and vision are the leadership qualities that will allow Tridium to realize our full potential," added Jerry Frank.

About Tridium

Tridium Inc. develops and markets a universal software platform - known as the Niagara Framework - that allows companies to build software applications for accessing, automating and

controlling smart devices in real-time over the Internet. This open, Java-based framework integrates diverse systems, devices and communications standards into an interoperable, Web-enabled application environment. In addition, Tridium offers the Niagara-powered Vykron suite, which is specifically designed for building automation and energy services applications.

Tridium is a privately held software company headquartered in Richmond, Va., with subsidiaries based in London and Singapore. The company has established key strategic alliances with leading corporations in the energy services, building control, home automation and industrial control industries. Tridium markets its products to value-added resellers, original equipment manufacturers and a network of Vykron Energy Resellers and Tridium Systems Integrators. Additional information about Tridium is available at www.tridium.com.
