## Tridium™ Inc. Wins Realcomm 2003 Digie Award for Most Innovative Technology, Partners Capture Two Additional Digies

**Richmond, VA, June 12, 2003** - Tridium, Inc.™, is proud to announce that it has been recognized as a premier technology provider with a Digie Award from Realcomm 2003. Tridium captured a Digie Award for The Most Innovative Technology, which represents the newest and most innovative technologies and automation products affecting commercial real estate.

In addition to capturing the Most Innovative Technology Award, two Digie's were awarded to organizations utilizing Tridium's revolutionary Niagara Framework in their solutions. Teng & Associates (Chicago) won a Digie for Facilities Management in the **Best Use of the Internet** category and the General Services Administration (GSA) Region 5 Federal Complex won a Digie in the **Digital Real Estate** Extreme Office Building category. The two awards resulted from work at The Federal Center Complex, which consists of three federal buildings and comprises over 2 million square feet of office space. The system, which consisted of almost 30,000 points, was networked on the GSA Wide Area Network to place it among the largest open control system implementations in the world.

"We are very pleased to have been recognized by real estate professionals for the value our technology offers", said John Petze, President and CEO of Tridium. "Realcomm has been instrumental in bringing creative new technologies to the commercial real estate market and being recognized by them as a leader validates our success in providing owners with practical solutions to enable enterprise-level management of their increasingly complex facilities. We also applaud Teng & Associates and the GSA for their work with our products and technology, and congratulate them on their Digies".

## About Tridium

Tridium Inc. develops and markets The Niagara Framework, a universal software platform that allows companies to easily implement software applications for accessing, automating and controlling smart devices in real-time over the Internet. This open, Java-based framework integrates diverse systems, devices and communications standards into an interoperable, Web-enabled application environment. In addition, Tridium offers the Niagara-powered Vykon suite, which is specifically designed for building automation and energy services applications.

Tridium is a privately held software company headquartered in Richmond, Va., with subsidiaries based in London and Singapore. The company has established key strategic alliances with leading corporations in the energy services, building control, home automation and industrial control industries. Tridium markets its products to value-added resellers, original equipment manufacturers, a network of Vykon Energy Resellers and Tridium Systems Integrators. Additional information about Tridium is available at [www.tridium.com](http://www.tridium.com).

## About Realcomm

Realcomm is the premier trade show and conference in the commercial real estate industry, dedicated to providing a forum where the most innovative technologies affecting the commercial real estate field can be discussed and debated. As part of the conference, Realcomm recognizes the most progressive and innovative companies with a Digie Award. Realcomm partners include Continental Automated Buildings Association (CABA), The International Real Estate Federation (FIABCI-USA), Institute of Real Estate Management (IREM), and American Institute of Architects (AIA).
