Tridium® Announces The Niagara Summit

Richmond, VA, December 2003 - Tridium, Inc. has announced plans for the first ever Niagara Summit, a two-day conference devoted to networking people, systems, and machines. This open conference will bring together end users, integrators, and developers for comprehensive learning and unmatched networking opportunities. Industry experts will lead intensive workshops and interactive panel discussions providing attendees with the very latest information on managing smart devices and connecting them to the enterprise.

Several sponsors have been secured including Platinum-level sponsors Sun Microsystems, Millennial Net, and Novus Technologies, as well as Media Sponsor M2M Magazine, and industry research groups Harbor Research and The FocalPoint Group. "The Niagara community has grown to such an extent that we see the need to support it with a world-class conference. While very successful in their own right, traditional trade-shows do not afford industry professionals the depth of information that they desire," said John Petze, President and CEO of Tridium. "It's a major step for the Niagara technology and demonstrates that it has achieved unparalleled market acceptance." The Niagara Summit will be held at the Saddlebrook Resort in Tampa, Florida May 3 and 4, 2004. For more information visit www.niagarasummit.com.

About Tridium

Tridium, Inc. develops and markets a universal software platform - known as the Niagara Framework - that allows companies to build software applications for accessing, automating and controlling smart devices over the Internet or intranets. This open, Java-based framework integrates diverse systems, devices and communications standards into an interoperable, Web-enabled application environment. In addition, Tridium offers Vykon, a software suite that is powered by the Niagara Framework and specifically designed for building automation and energy services applications.

Tridium is a privately held software company headquartered in Richmond, VA, with subsidiaries based in London and Singapore. The company has established key strategic alliances with leading corporations in the energy services, building control, home automation and industrial control industries. Tridium markets its products to value-added resellers, original equipment manufacturers, a network of Vykon Energy Resellers and Tridium Systems Integrators. Additional information about Tridium is available at www.tridium.com.
