

Tridium Announces 2006 Niagara Summit

***Conference for Connecting Minds and Machines
to be held April 30th-May 3rd at the Saddlebrook Resort***

RICHMOND, VA, August 29, 2005—Tridium, Inc. announced today that its 2006 Niagara Summit will take place April 30th through May 2nd at the Saddlebrook Resort in Wesley Chapel, Florida. An open exchange and conference focusing on Niagara-based ideas, techniques and developments, the Niagara Summit brings together integrators, end-users, consultants, OEM manufacturers, developers and resellers--- the Niagara Community--- to share experiences, hone their skills, share knowledge and network with peers. Held bi-annually, the inaugural event in May of 2004 was a resounding success for both attendees and those suppliers that took advantage of the opportunity to exhibit their Niagara-based solutions and complementary products.

The 2006 Niagara Summit will include general sessions, keynote speakers and interactive workshops that focus on the latest developments in creating device-to-enterprise solutions, M2M applications, Internet-enabled products and distributed real-time Internet-based automation systems. Sponsors and exhibitors will have the opportunity to network with the best and brightest individuals developing, installing and using Niagara-Framework based applications as well as industry leading systems integrators and end users.

“Tridium is committed to the on-going development and support of the Niagara Community”, said Marc Petock, Director of Marketing for Tridium. “The Niagara Summit is the only gathering of its kind dedicated to the advancement of the Niagara Framework. No other event brings together such a range of practitioners using the Niagara Framework; it’s the only place to share in this unique experience”. Additional information regarding the Niagara Summit can be found at: <http://www.niagarasummit.com>.

About Tridium Inc.

Tridium is the inventor of the Niagara Framework[®], an open software framework that integrates diverse systems and devices—regardless of manufacturer, communication standard or software—into a unified platform that is easily managed and controlled in real time over the

Internet or intranet using a standard web browser. System integrators use Niagara products to provide true open solutions without regard for specific protocols, products or technologies. Manufacturers adopt the Niagara Framework technology to move their products to the web, reduce development time, migrate legacy systems, develop new service offerings, and open up new markets. Today, there are over 40,000 instances of Niagara operating in over 6000 installations worldwide in applications that include: energy management, building automation, telecommunications, security automation, M2M, lighting control, maintenance repair operations (MRO), service bureaus and total facilities management – all realizing improved operational efficiencies, reduced costs and greater returns. . Tridium is a privately held software company headquartered in Richmond, Va., with subsidiaries in London and Singapore. Additional information about Tridium is available at www.tridium.com.
