Marathon Partners with Tridium, Inc., Inc.
Enabling Simple, Affordable Continuous Uptime for Unified Manufacturing Platforms

Littleton, Mass., USA (June 20, 2005) — Marathon Technologies Corporation, the leading developer and supplier of fault- and disaster-tolerant solutions for industry standard Microsoft® Windows® environments, announced today that it has signed a software alliance agreement with Tridium, Inc., a leading provider of software technology for device-to-enterprise applications and Internet-enabled products. This agreement will enable Tridium customers to purchase a fully integrated, supported solution that combines Tridium's Niagara Framework® software, which integrates diverse manufacturing systems and devices into a unified platform, with Marathon FTvirtual Server™ software, which provides simple, affordable, continuous uptime for any Windows application.

“This agreement allows our customers to maximize the efficiency of their operations with a unified platform that will operate continuously 24/7,” said John Petze, President and CEO, Tridium. “With Marathon protection, our customers will never have to worry about losing their access to Niagara Framework.”

“We are in the business of protecting important Windows applications from downtime,” said Gary R. Phillips, President and CEO of Marathon Technologies. “This agreement provides Tridium customers with assurance that Marathon FTvirtual Server software and Niagara Framework software will interoperate and that the two companies are cooperating to provide customers with a well-integrated and supported solution.”

About Marathon Technologies

Marathon Technologies Corporation (www.marathontechnologies.com) is the leading provider of software that delivers simple, cost-effective, continuous uptime for Windows applications. Marathon FTvirtual Server software unites two unmodified industry-standard servers into a >99.999% available configuration that appears to applications, networks, OS, and system administrators as a single fault tolerant server. Marathon software keeps applications

running nonstop through failures and disasters with no failover or interruption in service, no data loss, and no need for transaction rollback. Marathon is a privately held, venture-backed corporation based in Littleton, Massachusetts, USA, with offices worldwide. For more information call +1-978-489-1100 or 1-888-682-1142.

About Tridium, Inc.

Tridium is the inventor of the Niagara Framework[®], a software framework that integrates diverse systems and devices—regardless of manufacturer, communication standard or software—into a unified platform that can be easily managed and controlled in real time over the Internet or intranet using a standard web browser. Manufacturers adopt the Niagara Framework technology to move their products to the web, reduce development time, migrate legacy systems, develop new service offerings, and open up new markets.

Tridium is a privately held software company headquartered in Richmond, Va., with subsidiaries based in London and Singapore. Tridium markets its products to value-added resellers, original equipment manufacturers and a network of Tridium Systems Integrators. Additional information about Tridium is available at www.tridium.com or by contacting Marc Petock, Director of Marketing at (804) 747-4771.
