

JACE 8000 Trade-Up

MOVE TO N4 NOW AND SAVE

Niagara 4 is in its ninth release, so if you are a Niagara user on a legacy platform, you are missing out on powerful graphics visualization, provisioning, tagging, analytics enhancements, as well as on essential cybersecurity upgrades and cyber defense features that keep your deployments in compliance with today's enterprise IT standards.

New for 2020, Tridium is introducing a JACE 8000 Trade Up Program to incentivize your immediate N4 migration. Trade up any of your legacy hardware to JACE 8000 models now to save, while keeping your Niagara networks operable as you migrate to the latest Niagara Framework® release.

But act now! We have the sales programs, migration tools and support resources in place today for your smooth transition. Not only will these incentives expire, total costs for delaying your Niagara updates beyond July 1st, 2021, risk being much higher, as AX software licenses will no longer be sold and replacement parts for AX-era hardware will no longer be stocked.

JACE 8000 TRADE UP PROGRAM FOR 2020

From today through December 15, 2020, Tridium is offering a discount from list price for JACE 8000 models when eligible legacy JACEs are traded in.

DISCOUNTS

- All JACEs purchased before January 1, 2017
 - 20% discount off total list price for JACE 8000 hardware, software core, and SMA
- All JACEs purchased on or after January 1, 2017
 - 30% discount off total list price for JACE 8000 hardware, software core, and SMA (excludes NC-8005 and NC-8010)

DETAILS

- Discount amount is calculated off total list price for JACE 8000 hardware, software core, and initial Software Maintenance (SMA-8xxx-1YR-INIT)
- Discount is applied at the time of purchase to the software core (NC-8xxx) to realize the full discount
- Discount does not apply to new drivers not already on the target replacement JACE or software options added

Contact your Tridium account manager or Niagara partner today for more details on any of these programs.

ELIGIBILITY, TERMS & CONDITIONS

JACE PLATFORMS

- Active licensed JACE 2, 3E, 4,5, 6, 6E, 7 (AX or R2)

DRIVERS, SOFTWARE OPTIONS AND ACCESSORIES

- All standard drivers supplied by Tridium and supported on N4 will be migrated.
- 3rd-party drivers not supplied by Tridium need to be licensed through the supplier.

OTHER REQUIREMENTS

- The deactivated legacy JACE must be rendered inoperable or destroyed within 180 days of trade-up date.
- Requires a signed "JACE 8000 Trade up Terms and Conditions" agreement emailed to support@tridium.com

AX DEPRECIATION DATE

Legacy JACE replacement parts and Niagara AX licenses will not be available after July 1, 2021. No future AX software updates or patches will be released.
