

Honeywell

THE POWER OF **CONNECTED**

Honeywell Technology Experience Center

Washington, D.C.

101 Constitution Ave NW

Suite 500 West

Washington, D.C. 20001

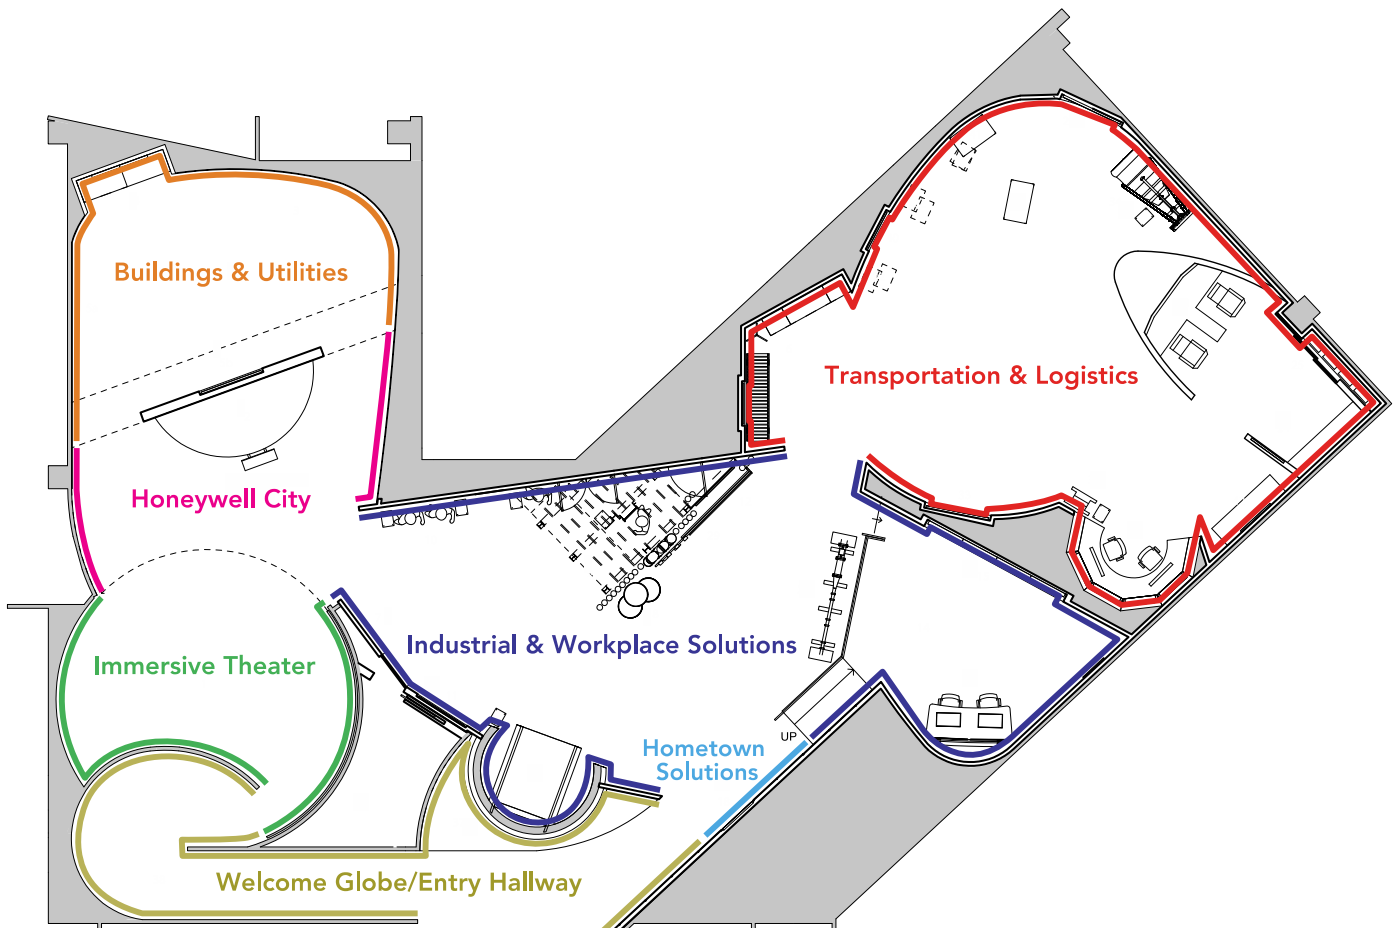

Description

The Honeywell Technology Experience Center (HTEC) is a state-of-the-art visitor center located in Honeywell's Washington, D.C., office. The center provides a powerful showcase of Honeywell's Connected Technologies.

Featuring over 5,500 square feet of interactive exhibits, the space is designed to highlight Honeywell's transformation from an industrial technology company to a Software-Industrial.

While touring the center, visitors learn first-hand about how Honeywell integrates physical products with software to support critically connected systems and industries. Among the displays are sections dedicated to Connected Buildings and Utilities, Connected Worker, Connected Plant, Connected Supply Chain, and Connected Aircraft.

Honeywell is a global Fortune 100 software-industrial company that delivers industry-specific solutions that include aerospace products and services; control technologies for buildings and industry; and performance materials. Honeywell helps aircraft, buildings, manufacturing plants, supply chains, and workers become more connected to make our world smarter, safer, and more sustainable.

Welcome Globe / Entry Hallway

Tours begin with a personalized introduction to Honeywell. Visitors are greeted by a 13½-foot globe where their company name can be displayed over moving clouds. The hallway is a visual primer to Honeywell and its Software-Industrial transformation.

“How Honeywell is Connecting our World”

An immersive theater experience features a 24-foot motorized panoramic screen with full surround sound. An overview video highlights how Honeywell solutions for a connected world address some of the world’s toughest challenges.

Honeywell City

This three-dimensional model features iconic landmarks and buildings that utilize Honeywell technologies. Watch the cityscape come to life through digital projection and explore with a single touch Honeywell innovations in use around the globe.

Connected Buildings & Utilities

Honeywell's solutions for Connected Buildings & Utilities enable cities that are smarter, safer and more sustainable. See innovations in real-time energy management and metering. At the Command Wall, experience advanced facility automation and controls.

Connected Industrial & Workplace Solutions

Honeywell's protective gear and Connected Worker software deliver the ultimate level of safety while monitoring, detecting and preventing danger from surrounding environments. Visitors can explore industry-specific innovations and even try on a bullet-resistant Spectra® vest.

Explore the expertise in Connected Plant technologies and controls that industrials worldwide rely on to improve safety, performance and profitability. Step up to our Experion® Orion Console and experience the state of the art for process control.

Connected Logistics & Transportation

Watch how our cloud-connected apps, workflows and hardware enable smarter distribution and retail across the Connected Supply Chain. Then explore our diverse Defense & Space portfolio with an interactive battle table, HTS900 engine and more.

Step inside the Connected Aircraft and experience how Honeywell is changing the world of aerospace. Get a view from the air traffic control tower; our Connected Airport lets visitors explore technologies from the terminal, runway and in-flight.
