ACCELERATING INNOVATION

NS2022
ACCELERATING INNOVATION

Niagara Development

Garrett L. Ward @ Tridium

Overview

NS2022
ACCELERATING INNOVATION

Developer Environment Setup

- Niagara 4 Developer
- Java 8 JDK
- node.js LTS
- IDE/Text Editor

Java 8

- ‘tools.jar + javac’ is sufficient for simply building
- Full JDK needed for (most) IDE integrations
- Available from various vendors:
 - ~~AdoptOpenJDK~~ ~~Adoptium~~ “Eclipse Temurin by Adoptium”
 - Azul Zulu Community™
 - Amazon Corretto
 - ...

Gradle

- <https://gradle.org>
- Niagara Gradle plugins
- Gradle wrapper
- Significant update in Niagara 4.13
 - Gradle 4.0.2 -> Gradle 7.x

Niagara Module

- Standard jar
 - Niagara module manifest 'module.xml'
 - Jar signature
- Module Parts
 - 'module' is logical grouping
 - 'runtime profile' indicates (roughly) purpose
 - 'module part' is actual .jar

Example: Basic Module Build

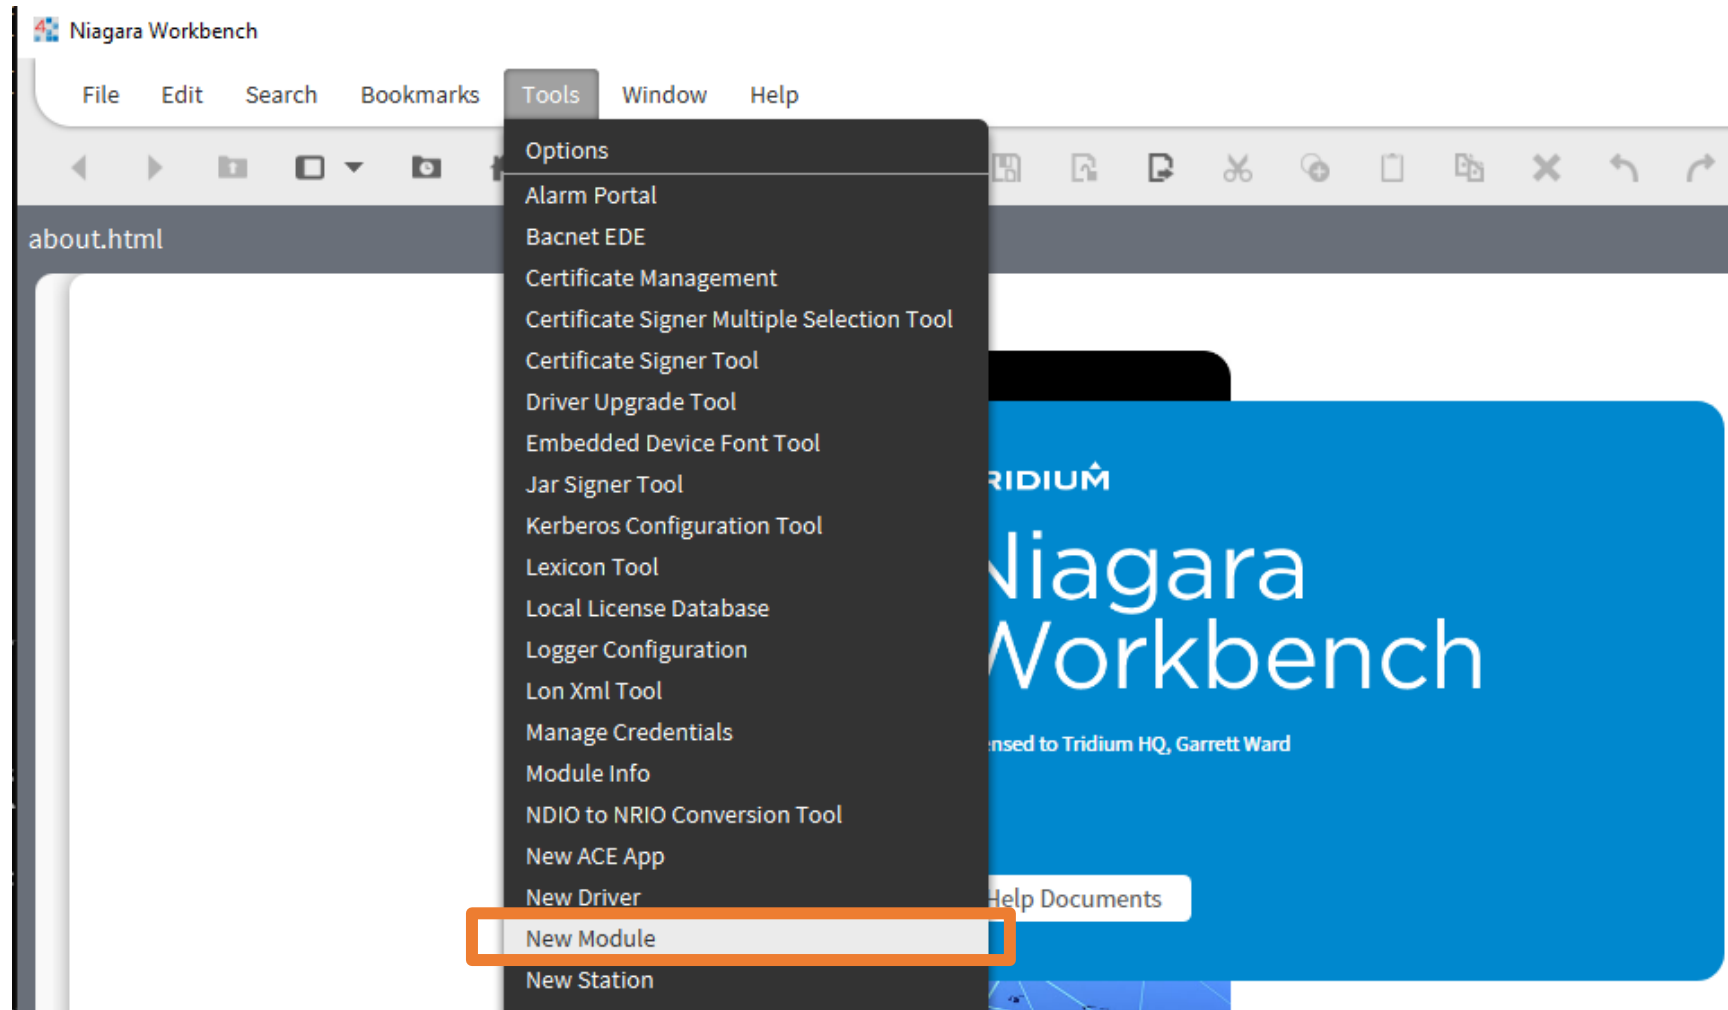

NS2022
ACCELERATING INNOVATION

Building Niagara Modules

- Create the module with the New Module Wizard
- Add a sample BComponent
- Add a sample BTestNg test
- Run Slot-o-matic on it
- Build it
- Test it

New Module Wizard

New Module Wizard

New Module Wizard
Step 1 of 3

Create Module under Directory
/C:/work/Niagara

Module Name myModule

Preferred Symbol mm

Version 1.0

Description My awesome module

Vendor glward

Runtime Profiles

- RUNTIME: Module JARs having core runtime Java classes only, no user interface.
- UX: Module JARs having lightweight HTML5+JavaScript+CSS user interface only.
- WB: Module JARs having Workbench or Workbench Applet user interface classes.
- SE: Module JARs having Java classes that use the full Java 8 Standard Edition (SE) platform API.

Example BComponent

```
package com.glward.myModule;
```

```
import javax.baja.nre.annotations.NiagaraProperty;  
import javax.baja.nre.annotations.NiagaraType;  
import javax.baja.sys.*;
```

```
@NiagaraType  
@NiagaraProperty(  
    name = "foo",  
    type = "baja:String",  
    defaultValue = "BString.make(\"bar\")"  
)  
public class BMyFoo  
    extends BComponent  
{  
}
```

```
@NiagaraProperty  
@NiagaraAction  
@NiagaraTopic
```

Example BTestNg Test

```
package test.com.glward.myModule;

import com.glward.myModule.BMyFoo;
import org.testng.Assert;
import org.testng.annotations.Test;

import javax.baja.nre.annotations.NiagaraType;
import javax.baja.test.BTestNg;
import javax.baja.sys.Sys;
import javax.baja.sys.Type;

@NiagaraType
@Test(groups = "ci")
public class BMyFooTest extends BTestNg {
    // test code
}

// test 'foo'
public void testFoo()
{
    // given
    BMyFoo myFoo = new BMyFoo();

    // when
    myFoo.setFoo("foo");

    // then
    Assert.assertEquals(myFoo.getFoo(), "foo");
}
```

Slot-o-matic

Annotations

```
@NiagaraType
@NiagaraProperty(
    name = "foo",
    type = "baja:String",
    defaultValue = "BString.make(\"bar\")"
)
```

Generated Slot Code

```
//region Property "foo"
public static final Property foo =
    newProperty(0, BString.make("bar"), null);
public String getFoo() { return getString(foo); }

Updates

NS2022
ACCELERATING INNOVATION

Gradle Breaking Changes

- Configuration name changes:
 - `'compile'` -> `'api'`
 - `'niagaraModuleTestCompile'` -> `'moduleTestImplementation'`

Gradle Breaking Changes

- Configuration name changes:
 - `'compile'` -> `'api'`
 - `'niagaraModuleTestCompile'` -> `'moduleTestImplementation'`
- `'niagaraModule'` -> `'moduleManifest'`
 - `certAlias` replaced with `niagaraSigning` extension

Gradle Breaking Changes

- Configuration name changes:
 - 'compile' -> 'api'
 - 'niagaraModuleTestCompile' -> 'moduleTestImplementation'
- 'niagaraModule' -> 'moduleManifest'
 - certAlias replaced with niagaraSigning extension
- environment.gradle -> gradle.properties

Gradle Breaking Changes

- Configuration name changes:
 - 'compile' -> 'api'
 - 'niagaraModuleTestCompile' -> 'moduleTestImplementation'
- 'niagaraModule' -> 'moduleManifest'
 - certAlias replaced with niagaraSigning extension
- environment.gradle -> gradle.properties
- vendor.gradle -> vendor extension in build.gradle.kts

Gradle Breaking Changes

- Configuration name changes:
 - 'compile' -> 'api'
 - 'niagaraModuleTestCompile' -> 'moduleTestImplementation'
- 'niagaraModule' -> 'moduleManifest'
 - certAlias replaced with niagaraSigning extension
- environment.gradle -> gradle.properties
- vendor.gradle -> vendor extension in build.gradle.kts

Updating existing builds

Updating existing builds

- Cheat – use the New Module Wizard
 - Create shell with new Gradle scripts
 - Copy src, srcTest, supporting files for each module
 - Fix dependencies
 - Fix module resources
 - Fix signing

Updating existing builds

module-rt.gradle

```
dependencies {  
    compile 'Tridium:history-wb:4.10'  
    compile 'Acme:fnord:1.0'  
  
    uberjar 'com.example:example:3.1415'  
  
    niagaraModuleTestCompile 'Tridium:test-se:4.10'  
}
```

module-rt.gradle.kts

```
dependencies {  
    api("Tridium:history-wb")  
    api("Acme:fnord")  
  
    uberjar("com.example:example:3.1415")  
  
    moduleTestImplementation("Tridium:test-se")  
}
```

Updating existing builds

module-rt.gradle

```
jar {  
    from('src/rc') {  
        include 'foo.png'  
        include '**/*.px'  
        exclude 'test.jpg'  
    }  
}
```

module-rt.gradle.kts

```
tasks.named<Jar>("jar") {  
    from("src/rc") {  
        include("foo.png")  
        include("**/*.px")  
        exclude("test.jpg")  
    }  
}
```

Updating existing builds

module-rt.gradle

```
niagaraModule {  
    certAlias = ["myCert"]  
}
```

module-rt.gradle.kts

```
niagaraSigning {  
    aliases.set(ListOf("myCert"))  
}
```

Build signing configuration

build.gradle.kts

```
signingServices {  
    signingProfileFactory {  
        allowDefaultProfile.set(false)  
    }  
}  
  
niagaraSigning {  
    aliases.set(listOf("myCert"))  
    signingProfileFile.set(project.layout.projectDirectory.file("security/niagara.signing.xml"))  
}
```

Build signing configuration

build.gradle.kts

```
signingServices {  
    signingProfileFactory {  
        allowDefaultProfile.set(false)  
    }  
}  
  
niagaraSigning {  
    aliases.set(listOf("myCert"))  
    signingProfileFile.set(project.layout.projectDirectory.file("security/niagara.signing.xml"))  
}
```

Build signing configuration

build.gradle.kts

```
signingServices {  
    signingProfileFactory {  
        allowDefaultProfile.set(false)  
    }  
}  
  
niagaraSigning {  
    aliases.set(listOf("myCert"))  
    signingProfileFile.set(project.layout.projectDirectory.file("security/niagara.signing.xml"))  
}
```

Build signing configuration

build.gradle.kts

```
signingServices {  
    signingProfileFactory {  
        allowDefaultProfile.set(false)  
    }  
}  
  
niagaraSigning {  
    aliases.set(listOf("NiagaraSigning"))  
    signingProfileFile.set(project.layout.projectDirectory.file("security/niagara.signing.xml"))  
}
```

All The Small Things

All The Small Things

- Gradle parallel builds

All The Small Things

- Gradle parallel builds
- JaCoCo support for test modules

All The Small Things
