Tridium Names Nino DiCosmo as President and General Manager

SEASONED TECHNOLOGY VETERAN JOINS LEADING SOFTWARE COMPANY

February 13, 2013 - Richmond, VA - Tridium announced today that Nino A. DiCosmo has been appointed the President and General Manager of the company. Mr. DiCosmo brings over a decade of executive experience in the technology sector to his new role, having previously served as an executive for several of the world's largest companies.

"With his experience and skill set, Tridium is fortunate to have someone of Nino DiCosmo's caliber leading the company," said Tom Rosback, acting General Manager. "Nino brings a strong set of skills to the task at hand and I am fully confident that he will lead Tridium to continued growth and market expansion."

"I am thrilled to be joining Tridium. As a global leader in enterprise software, Tridium is poised to move beyond its traditional markets. I look forward to meeting our core customers, strengthening those relationships and continuing the growth Tridium has established as a leading global software technology company," said Mr. DiCosmo. "It's an exciting time to be joining Tridium, especially as the company prepares for the release of its next generation market leading Niagara Framework."

Before joining Tridium, Mr. DiCosmo was a Senior Vice President and General Manager of New World Systems in Troy, MI. Prior to that, he was President and CEO of Trubiquity, Inc., in Rochester Hills, MI. In 2006, Crain's Detroit Business named Mr. DiCosmo to its "Top 40 Under 40" list.

Mr. DiCosmo holds an MBA from the University of Michigan, a MS in Information Systems Management from Carnegie Mellon University and a BA in Political Science from Oakland University. He serves on the Advisory Board for its College of Arts and Sciences. Mr. DiCosmo will be based at Tridium's Richmond, VA headquarters.

About Tridium:

Tridium is the global leader in open platforms, application software frameworks, automation infrastructure technology, energy management and device-to-enterprise integration solutions. Tridium's configurable software frameworks extend connectivity, integration and interoperability to the millions of devices deployed in the market today and empower manufacturers to develop intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets. Tridium platforms allow users to build and manage complex monitoring, control, and automation solutions, including applications for energy management, telecommunications, M2M and smart services building control, facility management, industrial automation, medical equipment and physical security. The company is an independent business entity of Honeywell International Inc. More information is available at www.tridium.com.
