

# Niagara Enterprise Security 2.3u1

## Features overview

# Features and benefits

Tridium expects to release a Niagara Enterprise Security 2.3 update in early May featuring:

## Database APIs

- Easy Lobby<sup>®</sup> visitor management
  - *Increase security by screening and tracking visitors*
- LDAP / Active Directory
  - *A single source of authority for logical and physical access*
- API for database integrations – Human Resources, etc.
  - *Synchronize your physical security with other personnel databases*

## JACE<sup>®</sup> 8000 licensing options

- Release licensing options for Niagara Enterprise Security (on Niagara AX) for JACE 8000
  - *A single hardware platform for all building systems*
  - *Powerful platform with memory and processing speed designed for Niagara 4 implementations*

## Video drivers

- Milestone driver for latest Milestone Xprotect Enterprise and Professional versions
- Milestone Xprotect corporate driver (same part number as Milestone Xprotect Enterprise and Professional)
- Axis Video driver validated with latest Axis versions

**Asure ID** – support for release 7.7.2
