Niagara AX Named Software of the Year & Tridium President Named Executive of the Year

RICHMOND, Va., January 27, 2015 — Tridium was recognized during the ControlTrends awards gala in Chicago last night for both its product and senior leadership. Niagara AX was recognized as the 2014 “Building Integration & Automation Software of the Year” and Tridium president and general manager, Nino DiCosmo, was recognized as the 2014 “Executive of the Year.” The ControlTrends Awards honor “new dimensions of insight, recognition and prestige to top performers in HVAC, Controls and Building Automation industries.” Winners are determined from a pool of nominees through online voting at ControlTrends.org.

“I am incredibly honored to accept this award on behalf of all of my colleagues at Tridium,” said DiCosmo. “I’m very proud of the work being done by our team as well as by our OEM’s and partners across the Niagara Community. Niagara4 and our next generation JACE will be launched this year and present incredible opportunities for the industry.. We’re excited about what lies ahead. This is a great way to start the year.”

“This award is a testament to the hard work of many people within Tridium and across the Niagara Community,” said John Sublett, CTO at Tridium. “It’s an honor to accept this award on behalf of my colleagues across the industry.”

With nearly a half-million installations worldwide, Niagara is quickly becoming the operating system of the Internet of Things. Its open API, open distribution business model and open protocol support give businesses and developers the freedom to choose how they work, what they build and with whom they partner. It enables them to connect and control devices, while normalizing, visualizing and analyzing data in ways never before imagined.

The Niagara Framework improves strategic decision-making on energy management and environmental impacts, allowing for optimized performance and cost reductions that can help businesses be more competitive and more profitable.

The next generation of Niagara, Niagara 4, builds on the 15-year legacy of the Niagara Framework, helping organizations to achieve optimal efficiency. End-users will find the latest generation of Niagara faster and easier to use—making it possible to directly access, analyze and act on a wide range of operational data. A truly open framework, Niagara 4 delivers a variety of significant improvements to help businesses take full advantage of the Internet of Things, including advanced visualization and new search, security and navigation tools. Features include:

- New HTML 5 based user interface and simpler navigation
- Enhanced performance and scalability
- Improved security
- Easier application development

- Data tagging and advanced search capabilities

About Tridium:

Tridium is the global leader in open platforms, application software frameworks, automation infrastructure technology, energy management and device-to-enterprise integration solutions. Tridium's configurable software frameworks extend connectivity, integration and interoperability to the millions of devices deployed in the market today and empower manufacturers to develop intelligent equipment systems and smart devices that enable collaboration and communication between the enterprise and edge assets. Tridium platforms allow users to build and manage complex monitoring, control, and automation solutions, including applications for energy management, telecommunications, M2M and smart services building control, facility management, industrial automation, medical equipment and physical security. The company is an independent business entity of Honeywell International Inc. More information is available at www.tridium.com.
