Tridium Launches Niagara Marketplace

New site hub for finding and sharing Niagara-related products and services

Richmond, Va., February 29, 2016 – Tridium Inc., a global Internet of Things (IoT) software technology leader, today announced the launch of Niagara Marketplace, a global network of Niagara Partners. The site, www.niagaramarketplace.com, will allow users of Niagara to find and contact providers of Niagara products and services that best fit their needs.

“The launch of Marketplace represents a major milestone in the growth of the Niagara Community,” said Nino DiCosmo, president of Tridium. “This dynamic innovation not only gives Niagara service and solutions providers unprecedented capacity to reach new customers, but it also enables those customers to more quickly find solutions that best fit their needs. As always, our goal is to continue to help Niagara users achieve better and faster results and, as a byproduct, give Niagara Partners the tools they need to grow sales around the globe.”

After signing up for Niagara Marketplace, partners are able to create and maintain their own listings and fill in their own contact information and website links, so users can be assured that the information they find is up to date and accurate. Partners also can tag their listings with keywords, which users can use when searching or browsing for products and services.

For end users, Niagara Marketplace is a one-stop-shop to find the best Niagara-based products and services to fit their needs. Niagara users worldwide also can leave ratings and reviews for the products and services listed on the Marketplace, making it easier for searchers to choose a solution with confidence.

To find out more about Niagara Marketplace or to register as a Partner or user, visit www.niagaramarketplace.com.
