

Patch Available for Oracle Java 7, Update 65

July 25, 2014

Niagara users can now install a patch that will fix issues related to Oracle's Java 7, Update 65, which appeared to cause the Niagara web applet to fail to completely load.

Complete installation instructions are available on Niagara Central:

https://community.niagara-central.com/ord?portal:/dev/wiki/PxPages_Fail_to_Load_After_Installing_Java_7_Update_65
